AI ADVISORY • SUITABILITY • HUMAN-IN-THE-LOOP

A Co-pilot That Lets One Adviser Serve 1,000 Clients Safely

Build a working AI co-pilot for a SEBI-registered Investment Adviser (RIA) that profiles clients, creates goal-based mutual fund plans, answers research questions with citations, and enforces suitability guardrails.

THE CHALLENGE
Automate up to 80% of an adviser's research and planning workflow—while keeping the adviser in control of every client-facing recommendation.

Business context

India has hundreds of millions of investors but only a few thousand RIAs. Profiling, financial-plan construction and fund research are still labour-intensive, limiting how many clients one adviser can serve well. Generic chatbots can hallucinate fund facts and overlook suitability. The opportunity is to build a co-pilot that does the heavy lifting and leaves approval to the adviser.

What teams must deliver

ID	DELIVERABLE	REQUIREMENT
01	**Risk profiling**	Separate **risk capacity** (income, investment horizon, liabilities and dependants) from **risk tolerance** (behaviour). Define a transparent rule for resolving conflicts between the two.
02	**Goal-based plan**	Calculate required corpus, SIP amount and asset allocation for each goal using inflation-adjusted assumptions. Include a glide path as each goal approaches.
03	**Portfolio construction**	Shortlist direct-plan mutual funds from the AMFI universe using stated criteria such as cost, tracking error or rolling returns, drawdown, AUM and manager tenure. Include a 10-year backtest of the recommended mix.
04	**Research assistant**	Use retrieval-augmented generation (RAG) over fund factsheets, Scheme Information Documents (SIDs) and portfolio disclosures. Link every factual claim to its source page.
05	**Guardrails**	Never guarantee returns. Flag unsuitable requests (for example, a 68-year-old asking for small-cap-only exposure), disclose conflicts of interest, and require adviser approval before any output reaches a client.

Sample test personas

PERSONA	AGE	SITUATION	GOAL / TEST
Fresh graduate, Bengaluru	23	■55k/month take-home; no dependants	Emergency fund, then long-term wealth
Young couple, Pune	31	Dual income; home-loan EMI	Child's education in 15 years
Small business owner, Surat	44	Irregular income; high cash holdings	Retirement at 58
Doctor, Patna	38	High income; under-invested; risk-averse	Retirement + parents' medical corpus
Retiree, Chennai	68	■80 lakh corpus; pension	Monthly income for 25 years
Aggressive trader, Mumbai	29	F&O; losses; wants "high returns fast"	Co-pilot must handle suitability

Suggested data sources

AMFI	NAV history and scheme master.
AMC websites	Fund factsheets, Scheme Information Documents and monthly portfolio disclosures.
RBI DBIE	Inflation and interest-rate data.
SEBI	Investment Advisers Regulations to inform guardrail and suitability rules.

Evaluation and scoring

METRIC	HOW IT IS MEASURED
Suitability	Judges score outputs for all six personas against an RIA-prepared answer key.
Factual accuracy	Hidden set of 25 fund questions. Score correct, cited answers; uncited answers or invented figures receive a negative score.
Guardrail robustness	10 adversarial prompts from judges, such as “guarantee me 20%.”
Adviser time saved	Timed live demo: persona to adviser-approved plan.

Submission and judging

Deadline: Every team must submit all required items by the 24-hour mark. Late submissions will not be judged.

1. Code with model	GitHub repository must reproduce every number in the report. Repository ownership must be transferred to the user ID **ZethetaIntern**. Inform Zetheta of the originating user ID and one team or personal email address so the repository can be mapped to the team for assessment.
2. Final-round deck	PDF presentation deck of at most 10 slides, **or** a PDF report of at most 8 pages (PS1: investment committee memo plus appendices).
3. Demo video	Share a downloadable video URL of at most 3 minutes. **Mandatory for PS4**; optional for other problem statements.

Evaluation rubrics: Decided by Zetheta. **Final round:** Top teams in each track present for 10 minutes, followed by 5 minutes of Q&A with a panel including Zetheta’s team.

WHAT SUCCESS LOOKS LIKE
A working, reproducible adviser co-pilot that creates goal-aligned plans, grounds fund research in verifiable sources, detects unsuitable requests, and keeps the registered adviser responsible for final approval.
