About the fund

Axis Multi Factor Passive FoF (Erstwhile Axis Equity ETFs FoF)

AXIS ASSET MANAGEMENT

Scheme Details

Type of Scheme

An open-ended fund of funds scheme investing in units of domestic Equity ETFs falling under the factor theme.

Minimum Investment

₹5000 and ₹1 thereafter

Entry Load

NA

Exit Load

If redeemed / switched-out within 15 days from the date of allotment: 1%

- If redeemed / switched-out after 15 days from the date of allotment: NIL

AUM (In Cr) (As on 30th Sep-2026)

₹ 33.17

Inception Date

24-Feb-2022

Investment Objective

To provide long-term capital appreciation from a portfolio investing predominantly in units of domestic Equity ETFs falling under the factor theme. There is no assurance that the investment objective of the Scheme will be achieved.

Fund Manager

- Mr. Nandik Malik
- Mr.Rohit Gautam

TER*(As on 30th Sep-2026)

Regular – 0.65%

Direct – 0.06%

BER*(As on 30th Sep-2026)

Regular – 0.55%

Direct – 0.05%

Benchmark

NIFTY 500 TRI

The above information should not be construed as promise, guarantee or forecast of returns. Table / Charts mentioned above are used to explain the concept and is for illustration purpose only.

What is Factor Investing ?

Factors behind a Blockbuster Movie

AXIS ASSET MANAGEMENT

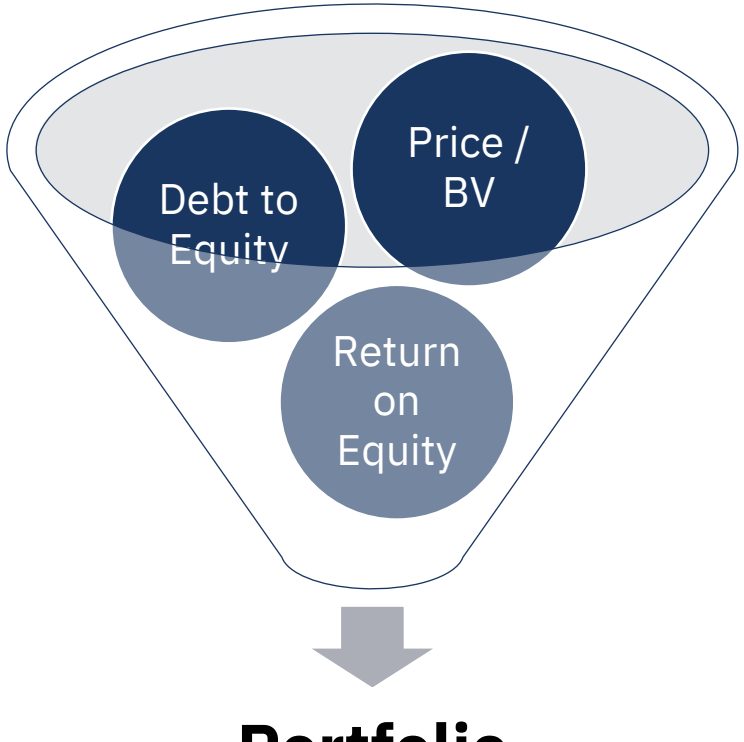

The success of a blockbuster movie can be broken down in terms of a combination of "Factors" such as –

- **Star cast**
- **Engaging storyline**
- **High-paced action sequences**
- **Great visual effects**

Factors behind a Robust Portfolio

AXIS ASSET MANAGEMENT

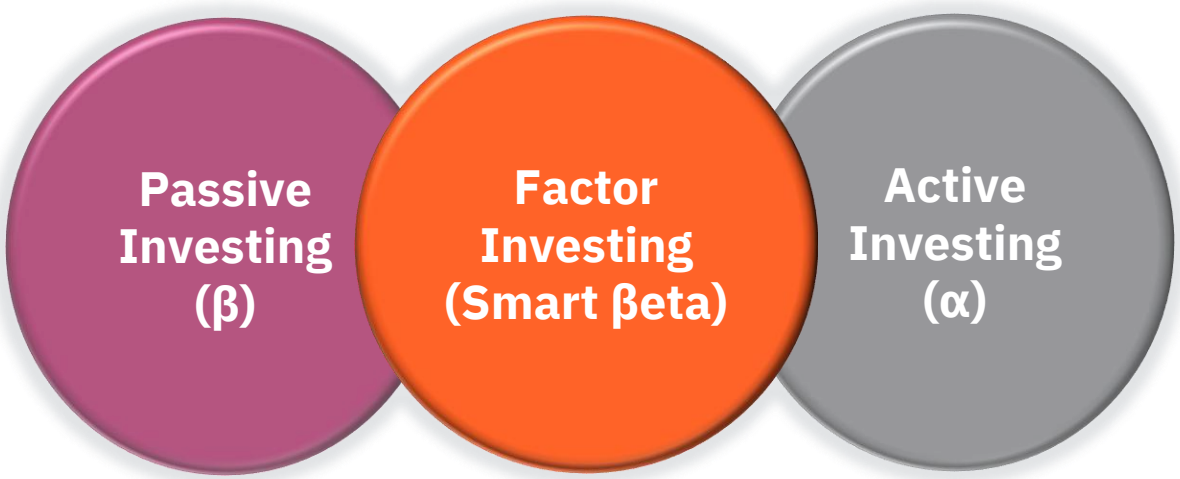

Similarly, the returns of a portfolio can be explained in terms of a combination of "Factors" –

- **Price to Earnings**
- **Price to Book**
- **Debt to Equity / Leverage Ratio**
- **Return on Equity**

Factor Investing – Combination of both worlds

AXIS ASSET MANAGEMENT

Factor investing sits between Active and Passive investing and looks to combine the best of both worlds

Passive Investing	Factor Investing	Active Investing
Market Return	Combination of both worlds **(beta and alpha)** **(aka - Smart Beta / Factors)**	**Potential to outperform market**
Low cost		**Stock Selection based on stock attributes**
Rule based framework		Fund Manager risk
Transparent		Identify factors to generate alpha

What are Factors?

AXIS ASSET MANAGEMENT

A factor is any characteristic that helps explain the long-term risk and return of an asset/stock.

Among many, commonly **popular factors are Momentum, Low Volatility, Quality and Value**.

Like in cricket attacking, classic and defensive batsmen play an important role to build solid batting lineup; adding factor(s) to your portfolio, can make difference to your portfolio performance.

Attack

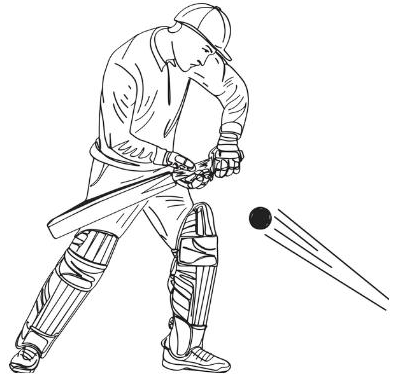

Momentum investing capitalizes aggressively during the bull markets, similar to an **attacking batsman.**

Class

Value investing relates to classic approach and performs during recovery phase similar to a **batsman's class** to build solid innings.

Defence

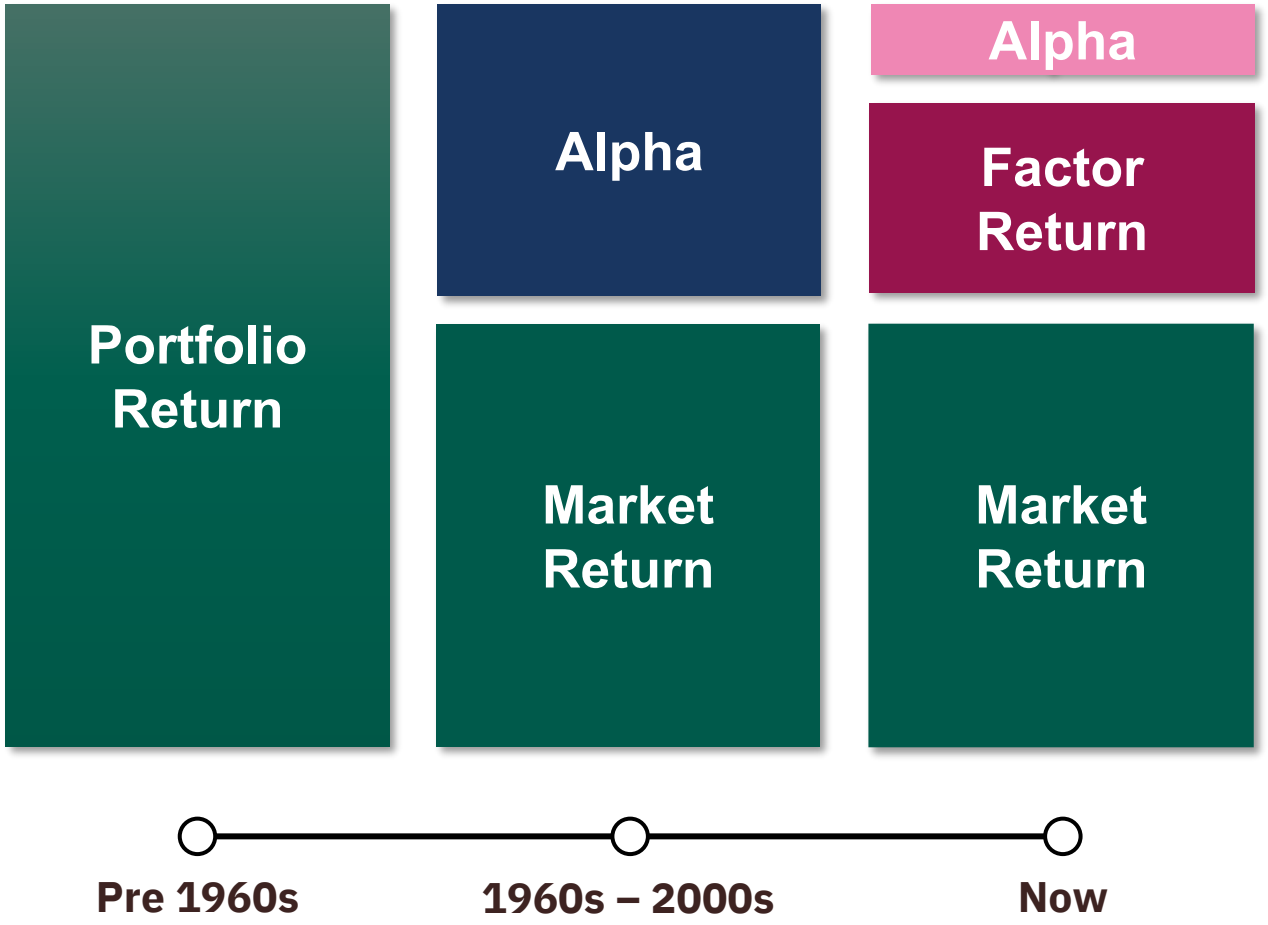

Low volatility & Quality investing aims for stable returns while reducing risk like a **defensive batsman** protecting their wicket.

Why Factors Matter?

AXIS ASSET MANAGEMENT

Evolution of performance evaluation globally

Are you a Factor investor?

AXIS ASSET MANAGEMENT

Do you look for one or more of the following when selecting which stocks to invest in?

Introduction to each factor

The Momentum Factor

AXIS ASSET MANAGEMENT

The Momentum factor exploits the tendency of winning stocks that are expected to continue doing well in the near term

Selects stock with strong recent performance

Historically worked well in sustained Bull markets

Works across market cap, sector & period

Most Dynamic as quickly catches on to sectoral trends

Measured using: 6M Return, 12M Return adjusted for volatility

6M = 6 months, 12M = 12 months

Refer Annexure : For entire list of factors across market caps.

The Low Volatility Factor

AXIS ASSET MANAGEMENT

The Low Volatility Factor involves buying stocks which have higher stability in price movements

Selects stock with lower volatility in price movements

Exhibited downside protection during market crashes

Good starting point for investors worried about market volatility

Historically outperformed over the long-term

Measured using: Standard Deviation for last 12 months

Refer Annexure : For entire list of factors across market caps.

The Quality Factor

AXIS ASSET MANAGEMENT

The Quality Factor captures companies with durable business models and sustainable competitive advantages

Selects stocks that have high RoE, high cashflows, low debt

Exhibited downside protection during market crashes

These businesses have strong & lasting competitive advantages

Historically outperformed over the long-term

Measured using: RoE, D/E, Cash Earnings

RoE = Return on Equity, D/E = Debt to Equity or Leverage Ratio

Refer Annexure : For entire list of factors across market caps.

The Value Factor

AXIS ASSET MANAGEMENT

The Value Factor captures stocks that are relatively 'inexpensive' compared to their fundamental attributes

Selects "cheaper" stocks that have low P/E, P/B, and P/S

Historically worked well during market recovery

Offers diversification benefit vs other Factors

Staging a turnaround after underperformance in 2010s

Measured using: P/E, P/B, P/S, Dividend Yield

P/E = Price to Earnings, P/B = Price to Book Value, P/S = Price to Sales

Refer Annexure : For entire list of factors across market caps.

- **No single Factor has outperformed others consistently**
- **However, they do outperform market over the long-term**
- **Adding Factors to your portfolio can help improve risk-adjusted returns**

Factors Indices > Momentum = Nifty200 Momentum 30 TR Index, Low Volatility = Nifty100 Low Volatility 30 TR Index, Quality = Nifty200 Quality 30 TR Index and Value = Nifty500 Value 50 TR

Source: NSE Indices, Date : 30-Sep-2026; Past performance may or may not be sustained in the future. The above information should not be construed as promise, guarantee or forecast of returns. Table / Charts mentioned above are used to explain the concept and is for illustration purpose only. Refer Annexure : For entire list of factors across market caps.

AXIS ASSET MANAGEMENT

7 Reasons: Consider Factors in your portfolio?

Factor portfolio is strictly rule based!

AXIS ASSET MANAGEMENT

Defining descriptors for each Factor

For e.g., 6M / 12M Price return for Momentum

Establishing rules to select a portfolio of companies using these descriptors

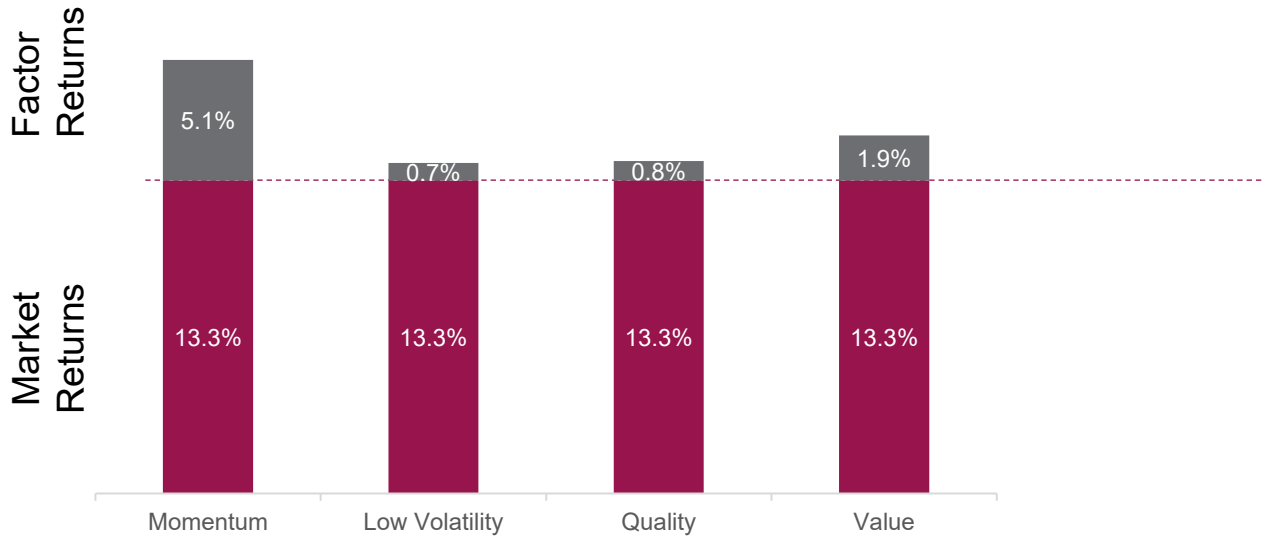

Applying these rules to create portfolios periodically – for e.g., semi-annually

What factor investing isn't – Ambiguous !

Factors have outperformed markets, historically

AXIS ASSET MANAGEMENT

	Nifty 500 TR Index	Momentum	Low Volatility	Quality	Value
15 Year	13.3%	18.5%	14.1%	14.2%	15.3%

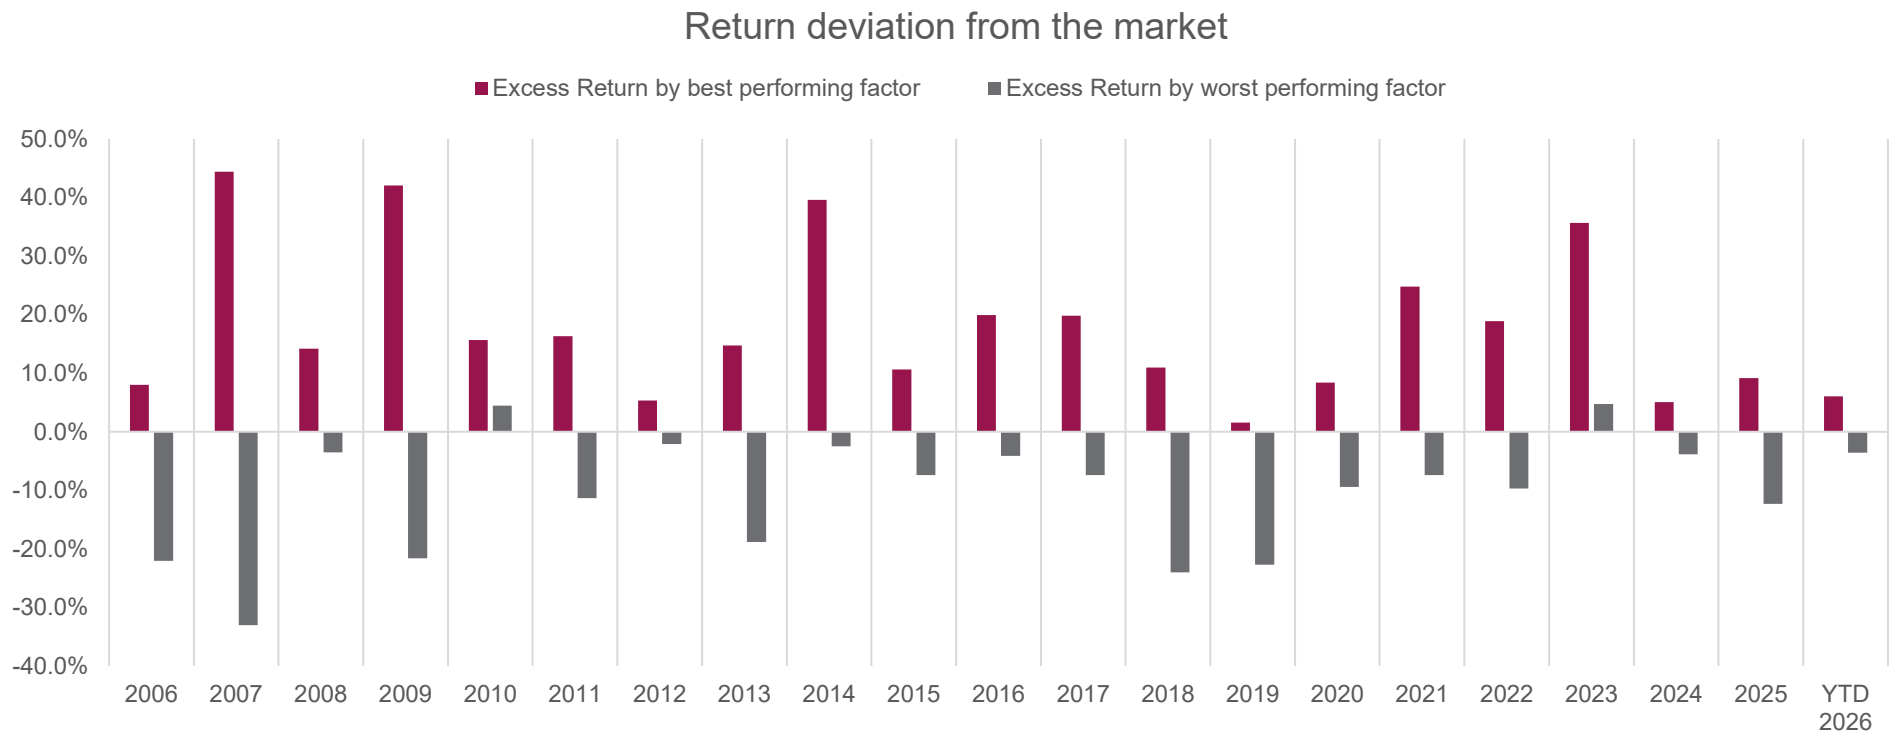

Factors Indices > Momentum = Nifty200 Momentum 30 TR Index, Low Volatility = Nifty100 Low Volatility 30 TR Index, Quality = Nifty200 Quality 30 TR Index and Value = Nifty500 Value 50 TR

Source: NSE Indices, Date : 30-September-2026; Past performance may or may not be sustained in the future. The above information should not be construed as promise, guarantee or forecast of returns. Table / Charts mentioned above are used to explain the concept and is for illustration purpose only. Refer Annexure : For entire list of factors across market caps.

Factors exhibit relatively less correlation with markets

AXIS ASSET MANAGEMENT

Factors tend to generate returns that are away from the market, exhibiting relatively lower correlation with the market.

Source: NSE and BSE Indices, Data from 30-Sep-2005 to 30-Jan-2026; Past performance may or may not be sustained in the future. The above information should not be construed as promise, guarantee or forecast of returns. Table / Charts mentioned above are used to explain the concept and is for illustration purpose only. Refer Annexure : For entire list of factors across market caps.

Factors have low correlation with each other

AXIS ASSET MANAGEMENT

Excess returns of Factors show very low correlation as different Factors respond differently across market and economic cycles

15 Year Correlation of Daily Excess returns

Excess Correlation Matrix	Momentum	Low Volatility	Quality	Value
Momentum	100%	1%	13%	12%
Low Volatility		100%	72%	-32%
Quality			100%	-29%
Value				100%

Building a robust portfolio by blending factors can be possible due to less correlation among factors

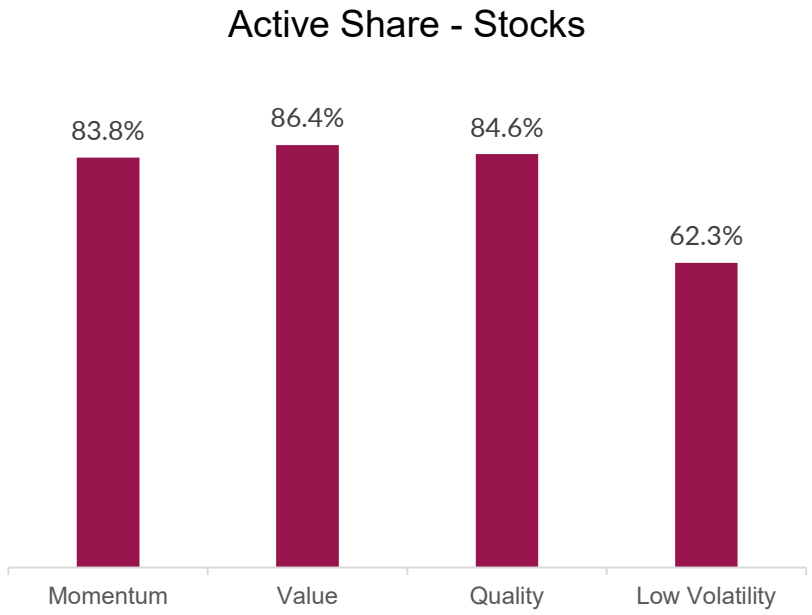

Factors Indices > Momentum = Nifty200 Momentum 30 TR Index, Low Volatility = Nifty100 Low Volatility 30 TR Index, Quality = Nifty200 Quality 30 TR Index and Value= Nifty500 Value 50 TR

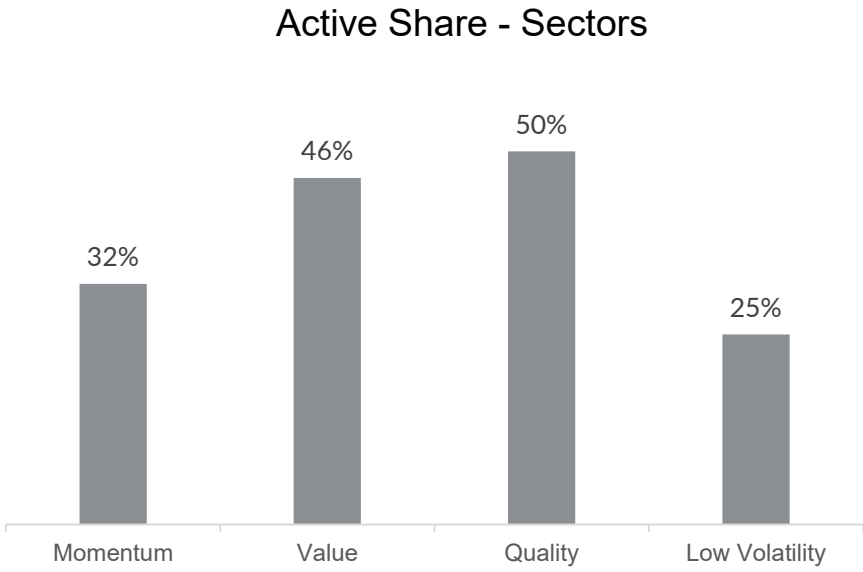

Source: NSE Indices, Data from 30-Sep-2026; Past performance may or may not be sustained in the future. The above information should not be construed as promise, guarantee or forecast of returns. Table / Charts mentioned above are used to explain the concept and is for illustration purpose only. Refer Annexure : For entire list of factors across market caps.

Factors portfolios exhibited high active share

AXIS ASSET MANAGEMENT

Factor benchmarks have very high active share in terms of stocks and sectors relative to broad based benchmark , which signifies they are different and not benchmark hugging strategies.

Factors Indices > Momentum = Nifty200 Momentum 30 Index, Low Volatility = Nifty100 Low Volatility 30 TR Index, Quality = Nifty200 Quality 30 TR Index and Value = Nifty500 Value 50 TR

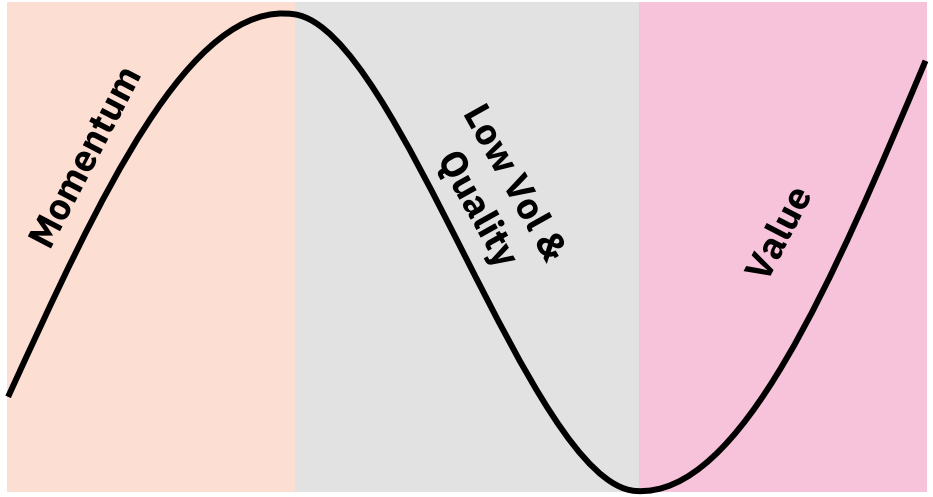

Source: NSE and BSE Indices, MOAMC, Data from 16-Sep-2005 to 30-Sep-2026; Past performance may or may not be sustained in the future. The above information should not be construed as promise, guarantee or forecast of returns. Table / Charts mentioned above are used to explain the concept and is for illustration purpose only. Refer Annexure : For entire list of factors across market caps.

Factors tend to repeat their performance according to market cycles

AXIS ASSET MANAGEMENT

Such a strategy would involve churning factors based on what cycle you expect the market to be in

Academic Research

Historical Performance of Factors In India

	Nifty200 Momentum 30 - TRI	Nifty100 Low Volatility 30 - TRI	Nifty200 Quality 30 - TRI	Nifty500 Value 50 - TRI	Nifty 500 - TRI
Bull	27.9%	19.3%	19.3%	25.4%	21.3%
Bear	-35.4%	-26.1%	-28.2%	-47.0%	-40.5%
Recovery	40.8%	39.8%	44.4%	55.1%	41.7%

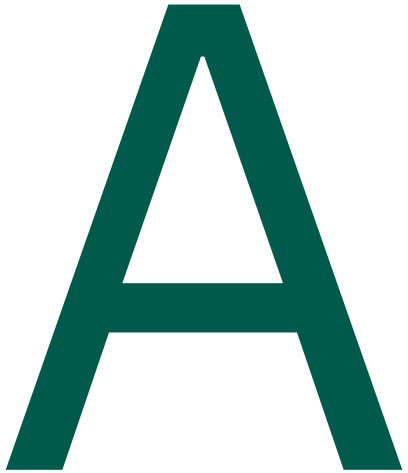

- **Momentum tends to significantly outperform in Bull market cycles**
- **Quality and Low Vol offer good downside protection and tend to outperform in Bear markets**
- **Value tends to outperform when the market is recovering from a bear phase**

Factors Indices > Momentum = Nifty200 Momentum 30 TR Index, Low Volatility = Nifty100 Low Volatility 30 TR Index, Quality = Nifty200 Quality 30 TR Index and Value = Nifty500 Value 50 TR

Source: NSE Indices, Data from 30-Sep-2005 to 30-Sep-2026; Past performance may or may not be sustained in the future. The above information should not be construed as promise, guarantee or forecast of returns. Table / Charts mentioned above are used to explain the concept and is for illustration purpose only. Factors works everywhere

AXIS ASSET MANAGEMENT

cross different markets (e.g. USA, India)

cross different asset classes (e.g. Equity, Bonds)

cross different time periods(e.g. 6m, 12m)

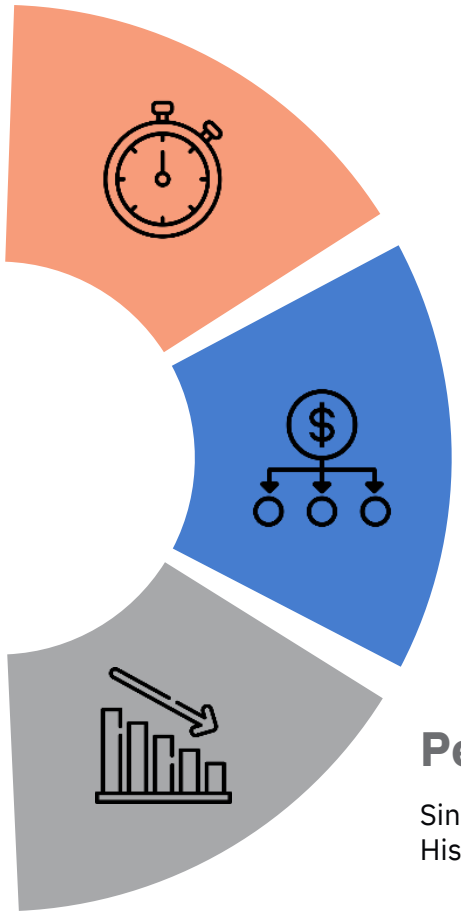

Source/Disclaimer: https://pages.stern.nyu.edu/~lpederse/papers/ValMomEverywhere.pdf

Using Factors in your Portfolio

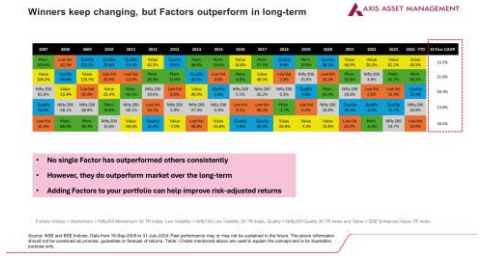

How to select the right factor(s) in your portfolio?

AXIS ASSET MANAGEMENT

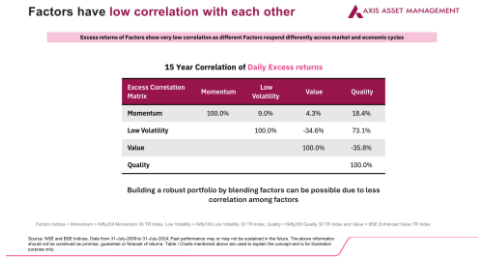

Factor timing can be difficult

Factor timing, just like market timing, can be incredibly difficult without the benefit of hindsight

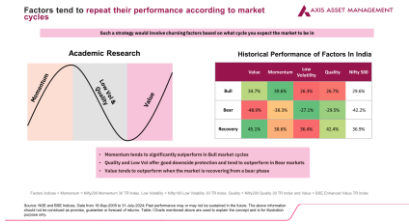

Diversification benefit

Excess returns of Factors show very low correlation as different Factors respond differently across market and economic cycles

Periods of underperformance

Single Factors work over the long-term because they don't work all the time. Historically, there have been considerable periods of underperformance

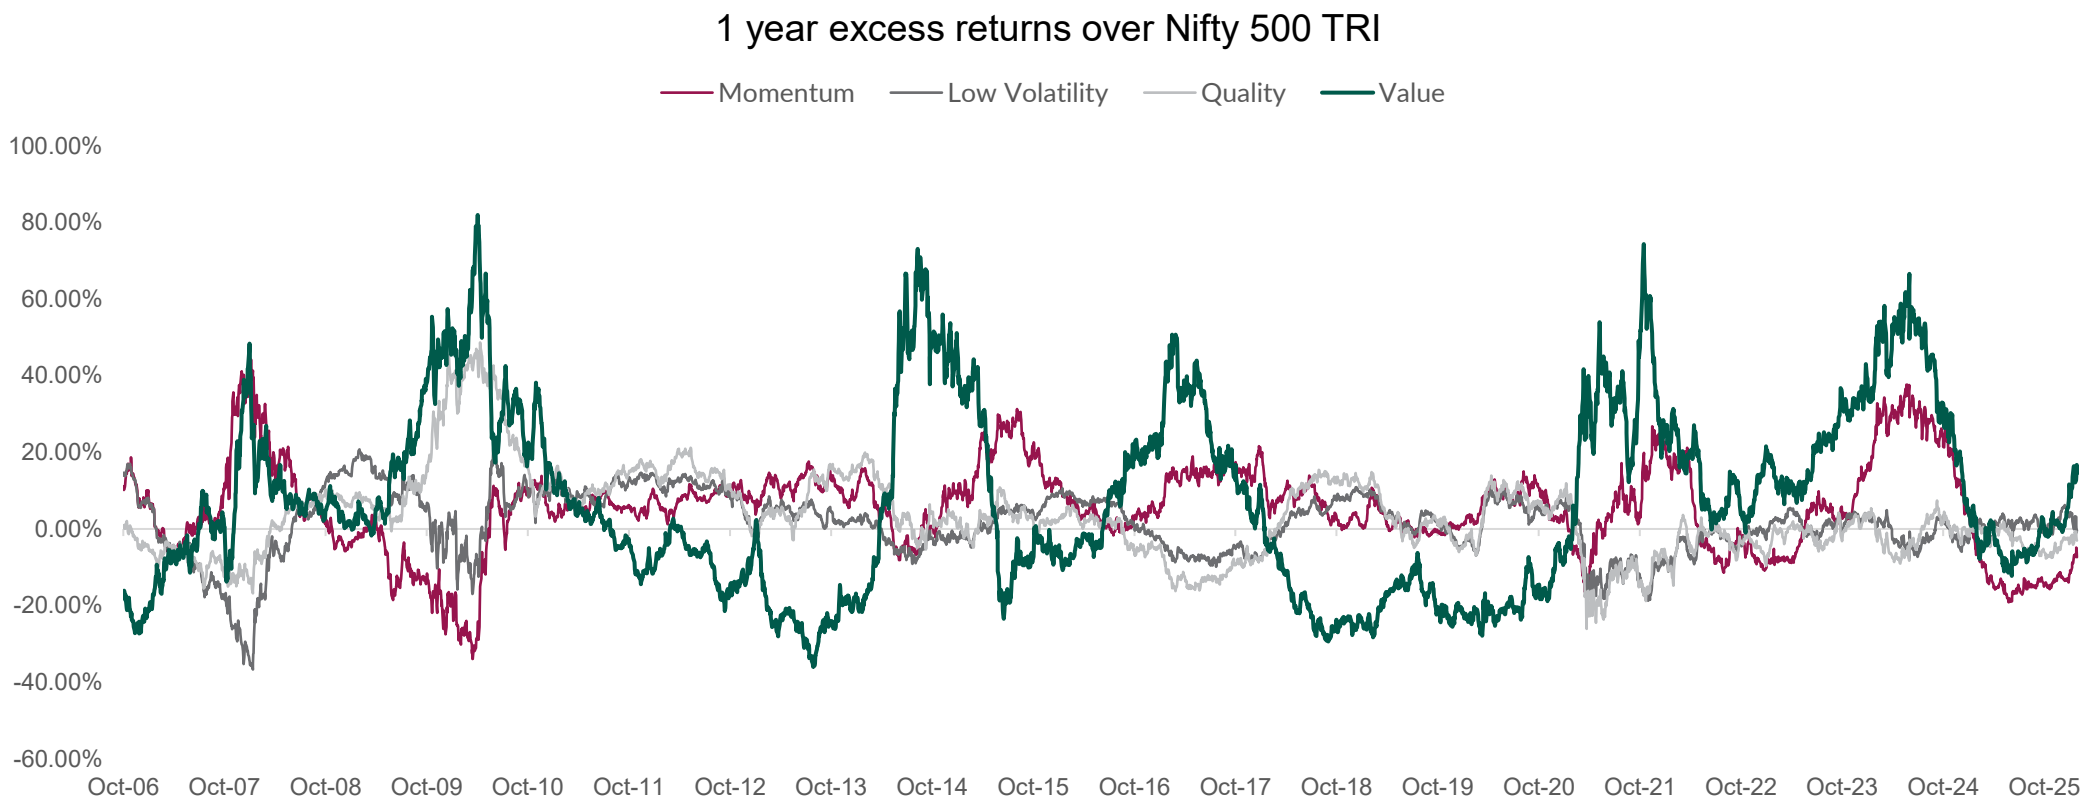

A Multi-Factor approach to Factor investing helps reduce Factor-specific risk without compromising on long-term performance

Multi-Factor approach offers consistency

AXIS ASSET MANAGEMENT

A simple Multi-Factor Equal Weight strategy which allocates 25% each to the four Factors shows why it is important to have a Factor diversified portfolio.

Factors Indices > Momentum = Nifty200 Momentum 30 TR Index, Low Volatility = Nifty100 Low Volatility 30 TR Index, Quality = Nifty200 Quality 30 TR Index and Value = Nifty 500 Value 50 TR Index

Source: NSE and BSE Indices, Data from 30-Sep-2005 to 30-Jan-2026; Past performance may or may not be sustained in the future. The above information should not be construed as promise, guarantee or forecast of returns. Table / Charts mentioned above are used to explain the concept and is for illustration purpose only.

Multi-Factor Study- Approach

AXIS ASSET MANAGEMENT

Kindly look for the parameters used for the research study –

1. **Underlying funds**
   - Momentum
   - Low Volatility
   - Quality
   - Value

2. **Allocation**
   - Equal Weight (i.e. 25% each)

3. **Rebalancing**
   - Quarterly

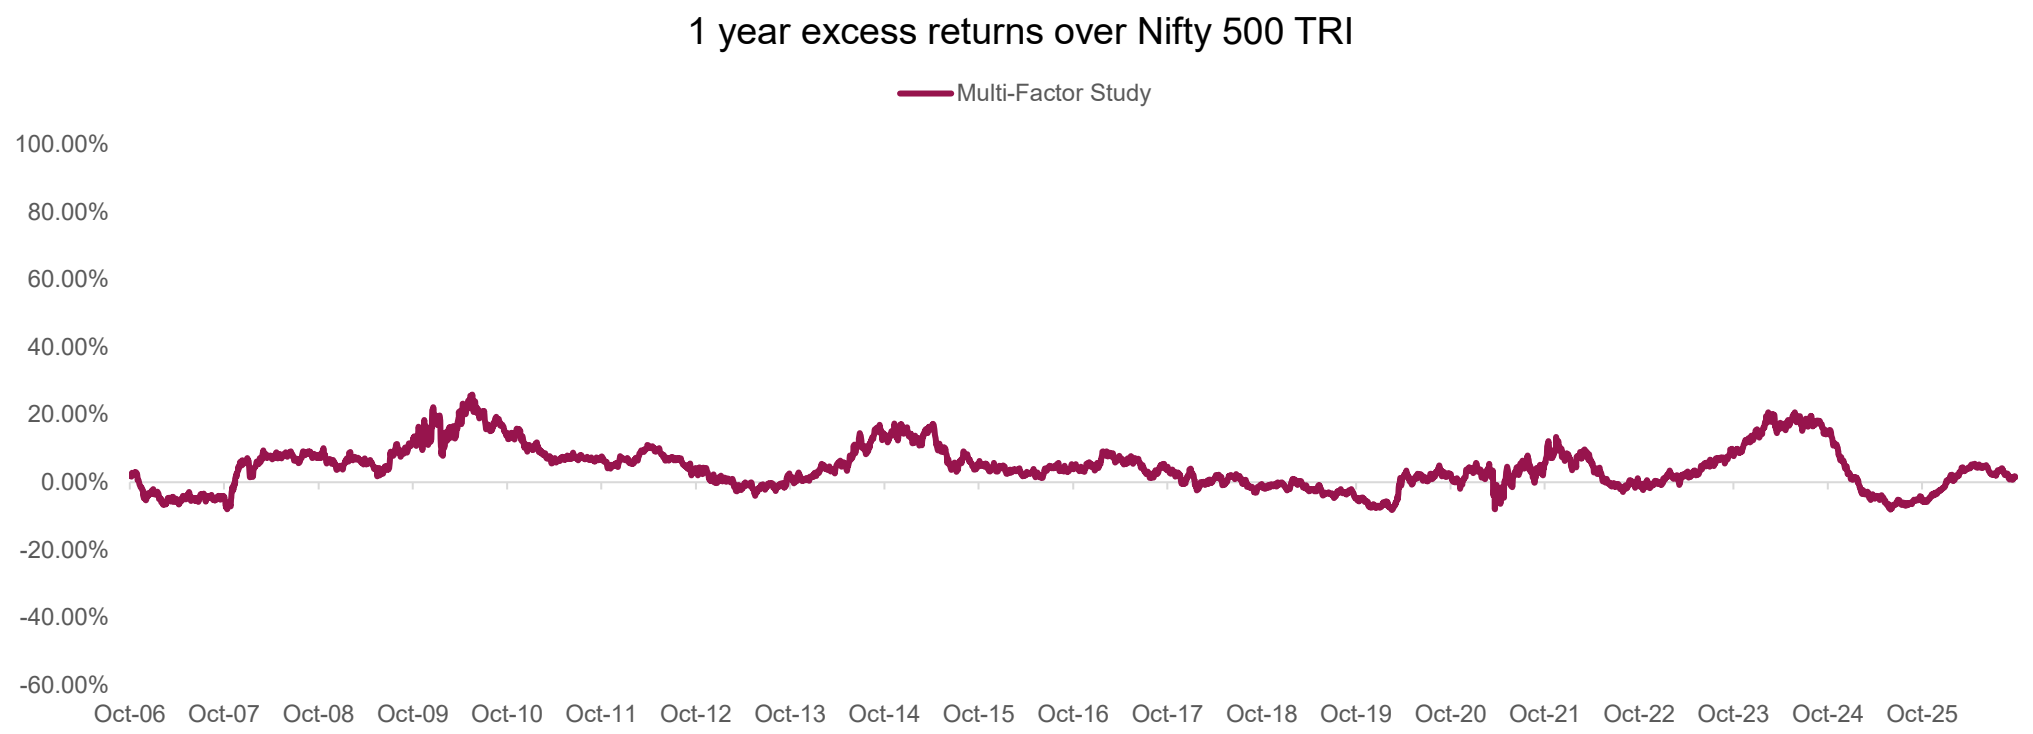

Factors Indices > Momentum = Nifty200 Momentum 30 TR Index, Low Volatility = Nifty100 Low Volatility 30 TR Index, Quality = Nifty200 Quality 30 TR Index and Value = Nifty 500 Value 50 TR Index

The Multi-Factor research Study performed by Axis Mutual Fund to help understand benefits of factor blending. Based on internal research. Refer slide 38 for fund related investment strategy.

Multi-Factor approach offers consistency

AXIS ASSET MANAGEMENT

A simple Multi-Factor Equal Weight strategy which allocates 25% each to the four Factors shows why it is important to have a Factor diversified portfolio.

Key Take Away

AXIS ASSET MANAGEMENT

1. Factor investing is increasingly catching attention of investors, globally as well as in India. In India Factor based funds AUM has grown to 49,000 cr. (as of Dec 2025).
2. Factors has historically exhibited outperformance to the broad-based benchmarks
3. Factor selection and timing can be challenging on individual basis.
4. Increasingly investors and advisors are using factor blending approach aiming to generate excess returns over market
5. According to Multi-Factor Study, four factor equal weight has exhibited outperformance to Nifty 500 TRI historically, in terms of point to point and rolling performance.*
6. Rule-based factor investing helps mitigate behavioral biases such as overconfidence, herd mentality, and loss aversion by enforcing a disciplined and systematic investment process.
7. Equity taxation is handled at the fund level for ETFs, allowing investors to benefit from tax efficiency, especially when rebalancing between factors, which would otherwise trigger capital gains if done individually.

Past performance may or may not be sustained in the future. The above information should not be construed as promise, guarantee or forecast of returns. Key Fundamental Attribute Changes (FAC)

AXIS ASSET MANAGEMENT

	Scheme Features
Investment Strategy	The scheme follows an active investment strategy. The Scheme, being a fund of funds scheme, will invest in units of ETFs (managed by Axis Mutual Fund or any other Mutual Fund(s)) within the asset allocation pattern. The fund manager based on their outlook / model will decide on the weightage to be assigned to one or more factor-oriented ETFs subject to investments in schemes falling under a single factor not exceeding 40% of the net assets of the scheme. Indicative list of factors across all market caps where the scheme will invest: i. Momentum ii. Quality iii. Growth iv. Value v. Alpha vi. Low Volatility vii. High Beta viii. Dividend / Dividend Opportunity / Dividend Points ix. Equal Weights. The fund manager may identify Domestic Equity ETFs from the above factors that are likely to outperform over a medium to long term investment horizon. The scheme by utilizing a holistic risk management strategy will endeavor to manage risks associated with investing in equity markets.
Asset Allocation	<table><tr><th rowspan="2">Instruments</th><th colspan="2">Indicative allocations (% of total assets)</th></tr><tr><th>Minimum</th><th>Maximum</th></tr><tr><td>Units of Domestic Equity ETFs falling under factor theme#</td><td>95%</td><td>100%</td></tr><tr><td>Debt and Money Market Instruments*</td><td>0</td><td>5%</td></tr></table> * Including units of liquid and overnight schemes. For complete Asset allocation pattern, refer to the SID.

The Scheme characteristics including the investment strategy shall be changed post change fundamental attribute which will be effective from July 17, 2025. Please refer www.axismf.com for Notice issued for additional changes in fundamental attribute.
